

RSA ARCHER CODE OF FEDERAL REGULATIONS SOLUTION

AT-A-GLANCE

- Automates the download process for consuming CFR data
- Configurable data feed enables selective content download
- Provides greater enterprise visibility to new and updated CFR regulations

OVERVIEW

The RSA Archer U.S. Code of Federal Regulations solution enables organizations to implement a systematic and repeatable process for consuming and maintaining compliance to the U.S. Code of Federal Regulations (CFR) by automating the process for importing CFR data into the Archer GRC platform. Companies can choose to download the entire CFR by year or configure the solution to download individual chapters. The solution provides business owners with greater visibility into new CFR regulations as well as changes to existing regulations that could affect the organization, empowering the business owners to take the appropriate steps to ensure the business maintains its compliance status.

The RSA Archer CFR Solution enables organizations to:

- Automates the process for consuming CFR regulations
- Expands the Archer content library to include the entire set of CFR regulations
- Simplifies and streamlines the process of consuming new CFR regulations as well as maintaining compliance and awareness to changes to existing regulations
- Increases organizational awareness and visibility to CFR regulations that impact the business

The RSA Archer CFR solution is a first step for organizations seeking better control and visibility into their regulatory compliance status. By adding the RSA Archer Regulatory Change Management solution, organization will have the ability to fully track, monitor and document the impact of regulatory changes on the business.

Data Feed Manager: CFR Data Feed

Transport Configuration

Enter the required credentials to allow the data feed to locate and access the HTTP site and retrieve the specified source information. If necessary, specify header parameters that will accompany your HTTP request.

File Type: Zip File File Filter:

Encryption Type: None

Action Type: Get

Logon Properties

Use Credentials: Anonymous Select this option if the HTTP site allows public access to the information.
 Specific Select this option if the HTTP site restricts access to the information. Specify which authorized account will make the HTTP request.

Specify Credentials: Data Feed Service Select this option if the Data Feed Service account will be the account that makes the request to the HTTP site.
 Other Select this option to use a separate account to make the request to the HTTP site. Enter the credentials for this account in the following fields.

User Name: Password:

Domain:

Data Request Properties

Configure the HTTP site to connect to retrieve the data source. Include any header parameters that are required.

* Data Request URI:

Header Parameters:	Key	Value	Actions
	<input type="text"/>	<input type="text"/>	<input type="button" value="Add"/>

Proxy

Select whether the data feed must pass through a proxy to access the source information. If a proxy will be utilized, enter the credentials for accessing the proxy.

Proxy Options: No Proxy Yes Name:

Port: Domain:

User Name: Password:

DATA SHEET

PREREQUISITES

- Access to an Archer Solution (Policy is recommended)

U.S. CODE OF FEDERAL REGULATIONS*

The U.S. Code of Federal Regulations is an annual codification of the general and permanent rules published by the Federal Register by the department and agencies of the U.S. Federal Government. It is divided into 50 titles that represent broad areas subject to Federal regulation.

Each Title is divided into chapters that are assigned to agencies issuing regulations pertaining to that broad subject area. Each chapter is divided into parts and each part is then divided into sections -- the basic unit of the CFR.

The purpose of the CFR is to present the official and complete text of agency regulations in one organized publication and to provide a comprehensive and convenient reference for all those who may need to know the text of general and permanent Federal regulations.

The CFR is keyed to and kept up-to-date by the daily Federal Register. These two publications must be used together to determine the latest version of any given rule. When a Federal agency publishes a regulation in the Federal Register, that regulation usually is an amendment to the existing CFR in the form of a change, an addition, or a removal.
